Our **STEM IT** Program

Your Development Opportunities

- Opportunity to contribute to your **local organization's results**
- **Training** of Prysmian Group Academy
- **Buddy Program** during your first year
- **Career development opportunities** and **Mentorship** programs, based on performance

Join our global network of **WOMEN in STEM**

We've started our **diversity and inclusion** efforts a while ago with our "Side by Side" initiative; we believed then and we strongly advocate every day that people create companies and its own values and stories.

Being a more supportive and inclusive company also means becoming a better and more performing one.

This is our everyday mission for a long-term plan. As a company we have defined **targets** to achieve by **2030** in the area of **social sustainability**.

One of our goals is to hire and develop **+500 women in a fully dedicated STEM program by 2030** and inspire the new generation of women to pursue a career in **technical and scientific roles**.

Develop your **STEM** career with us and lead by example

Within our STEM IT Program, you will have the opportunity to take on a **challenging role** and embark on an exciting learning journey!

On top of the STEM IT development path, during the first three years you will also grow through customized **Women in Leadership** trainings where

you will join with your manager and other Women in STEM colleagues.

We will support your development through **Mentoring and Coaching programs** (based on performance) and you will join our global network of **#PrysmianGroupWomenInSTEM**.

Be part of an **equal and diverse** network
